PROJECTS

AUTOMATED ATTENDANCE SYSTEM FOR RURAL SCHOOLS	Current
Python, OpenCV, FaceNet, YOLOv8, FastAPI, React, MySQL	
Designed and developed an intelligent attendance management system utilizing YOLOv8 for real-time face detection and FaceNet embeddings for accurate identity recognition. Engineered backend services for attendance processing, user enrollment, and data management, while creating a responsive dashboard for attendance monitoring, analytics, and report generation. Optimized recognition workflows to ensure reliable performance in real-world classroom and workplace environments.	
HOSPITAL MANAGEMENT SYSTEM	Dec 2025
MongoDB, Express.js, React, Node.js, JWT, Redux	
Designed and developed a comprehensive hospital management system supporting role-based access for administrators, doctors, and patients. Built features including appointment booking, patient medical record management, doctor scheduling, and administrative controls. Developed secure RESTful APIs, implemented JWT-based authentication, and created responsive dashboards to optimize healthcare workflow management and enhance operational efficiency.	
Student Collaboration System	May 2025
MongoDB, Express.js, React, Node.js, Socket.io, JWT, REST APIs	
Built a comprehensive student collaboration platform to facilitate project-based learning and teamwork. Developed modules for team formation, task assignment, progress tracking, real-time communication, and document sharing. Implemented secure authentication, scalable backend services, and an interactive frontend dashboard to improve collaboration efficiency and academic project management.	

ACHIEVEMENTS

Participated and reached Finals in Gamathon-25 (Sri Eshwar College of Engineering)	2025
